SUMMARY

Full Stack MERN Developer with strong foundation in Data Structures, Algorithms, and scalable system design. Experienced in building end-to-end web applications with secure authentication, optimized performance, and clean architecture. Solved 300+ problems on LeetCode demonstrating strong problem-solving skills. Passionate about developing real-world impactful applications and continuously improving coding efficiency for software engineering roles.

SKILLS

Languages: JavaScript(ES6+), C, C++, Java, HTML, CSS, Python, C#

Frontend: React, React Native, Next.js, Framer Motion, Tailwind CSS

Backend: Node.js, Express.js, JWT, REST APIs, Microservices, .NET (Basics)

Database: MongoDB, MySQL, OpenSearch (Elasticsearch), MinIO(S3-compatible), SparkSQL

DevOps and Cloud: AWS (EKS, S3, Lambda, SQS), Azure (Basics), Docker, Kubernetes, CI/CD, GitHub Actions

Data Engineering: Apache Spark, Databricks (Basics)

Core: Data Structures & Algorithms, Object Oriented Programming, Database Management System, Operating System

PROJECTS

Healthcare Data Pipeline System | *Python, Apache Spark, Azure*

- Developed a scalable data pipeline to process large healthcare datasets using Python and Apache Spark
- Performed ETL operations including data cleaning, transformation, and aggregation using SparkSQL
- Simulated cloud-based data workflows using Azure services concepts
- Handled large structured datasets improving processing efficiency
- Gained hands-on experience in distributed computing and data engineering pipelines

Legal Document Management System | *MERN*

Ongoing

- Building a secure and scalable platform to manage and organize legal documents
- Implemented role-based access control (RBAC) for user authorization
- Integrated JWT authentication ensuring secure login and session handling
- Designed file upload and storage system using MongoDB and cloud services
- Developed advanced search and filtering for efficient document retrieval
- Followed clean code practices and modular architecture for scalability

ACHIEVEMENTS

- Solved 300+ DSA problems on LeetCode and other coding platforms
- Strong understanding of problem-solving patterns like recursion, DP, graphs, and sliding window
- Consistently practiced competitive coding improving logical thinking and speed
- Built multiple real-world full-stack projects from scratch

CERTIFICATIONS

- Full Stack MERN Development - Apna College
- Meta Front-End Developer Professional Certificate - Coursera
- HackerRank SQL Advanced Certification
- Hands-on experience in REST APIs, authentication, and backend development

EXPERIENCE / RESPONSIBILITY

- Captain of CSE Department Badminton Team, leading and managing a team of 20+ members
- Organized practice sessions, coordinated team activities, and improved team performance
- Actively practicing Data Structures and Algorithms for placement preparation
- Building and deploying full-stack MERN applications regularly
- Using Git and GitHub for version control and collaboration
- Improving debugging and problem-solving through hands-on development
- Exploring backend architecture, authentication, and API design

EDUCATION

B.Tech in Computer Science Engineering

St Thomas College of Engineering and Technology

Aug 2022 – July 2026

CGPA: 7.10/10
